Pick the right size

Wheel size depends on height more than age. Measure the rider and check the chart.

	12″	Age **3–5 years**	Height **85–105 cm**	Page 3
	16″	Age **4–8 years**	Height **105–120 cm**	Page 3
	20″	Age **6–12 years**	Height **120–135 cm**	Page 5
	24″	Age **10+ years**	Height **135–150 cm**	Page 8
	26″	Age **12+ years**	Height **150–190 cm**	Page 9

Between two sizes? Take the smaller one: easier to control and quicker to learn on.

Inside
